Profile Summary

Self-motivated and skilled leader with extensive experience as a Project Manager and ERP Specialist, proficient in managing, implementing, and supporting various ERP systems, including Microsoft Dynamics Finance & Operations, Dynamics 365 Business Central, Dynamics NAV, Dynamics CRM, Dynamics Customer Experience, and Syspro. Proven track record of delivering projects across diverse industries within the African continent.

Core Competencies

Project Management: Expertise in developing project plans, scopes, and schedules, including resource allocation. Proficient in breaking down projects into tasks and milestones, defining clear goals and deliverables, and monitoring progress while identifying risks and mitigation strategies.

Team Leadership: Experienced in assembling and leading project teams, fostering open and collaborative environments. Skilled in effective communication of project goals, expectations, and updates to stakeholders, while managing conflicts to ensure smooth collaboration.

Budget Management: Strong ability to develop and manage project budgets, track expenses, and allocate resources efficiently to meet project needs. Adept at stakeholder management, gathering feedback, and maintaining positive relationships through regular updates.

Risk Management: Proficient in identifying, assessing, and mitigating project risks proactively. Experienced in developing contingency plans and implementing processes and tools for effective risk management.

Project Delivery: Committed to delivering projects on time, within budget, and in accordance with scope and quality standards. Conducts project retrospectives to identify lessons learned and improve future initiatives, ensuring proper documentation and handover of deliverables.

ERP Specialization: Strong background in business requirements analysis, feasibility studies, system configuration, change management, and customer satisfaction. Skilled in conducting training (both classroom and online) and overcoming challenges through effective people management and systems documentation.

Work Experience

Automation Consultant at Kifiya Financial Technology PLC (2025-01-02 - 2025-06-30)

Location: Addis Ababa, Ethiopia

Responsibilities: Designing, implementing, and optimizing automation solutions to enhance business processes and operational efficiency.

1. Process Analysis & Automation Strategy

Assessing existing business processes and identifying opportunities for automation. Designing and implementing workflow automation to optimize efficiency and reduce manual effort. Collaborating with stakeholders to define

automation goals and expected outcomes.

2. ERP & System Integration

Implementing automation within ERP systems to streamline financial operations. Integrating various business applications and third-party services to improve data flow and system connectivity. Ensuring automation aligns with financial compliance and regulatory requirements.

3. Technology Implementation

Configuring and deploying automation solutions across departments. Providing technical support for automation-related issues.

4. Data Management & Reporting

Automating data extraction, transformation, and reporting processes. Enhancing data accuracy and reducing errors through automation. Enabling real-time reporting and dashboarding for better decision-making.

5. User Training & Change Management

Training employees on the use of automated workflows and digital tools. Managing change by ensuring smooth adoption of automation solutions. Providing documentation and best practices for maintaining automated systems.

6. Performance Optimization & Continuous Improvement

Monitoring automation performance and making necessary adjustments. Identifying new automation opportunities and recommending enhancements. Staying updated on emerging automation technologies to improve business processes.

Enterprise Resources Planning (ERP) Implementation Consultant at BURN Manufacturing (2019-08-19 - 2021-05-19)

Location: Ruiru, Kenya

Responsibilities: Successful Implementation of Microsoft Dynamics 365 Business Central

Focus Areas: Production, Sales, Procurement, Finance, Service, Inventory.

Key Responsibilities and Achievements:

Collaboration with Implementation Partner:

Worked closely with the implementation partner to address all setup and hardware needs, ensuring a seamless installation process.

Project Management:

Ensured the project adhered to the established timeline, initiating corrective actions when necessary to keep the project on track.

Training Development:

Collaborated with the implementation partner to develop comprehensive training plans, successfully training employees on the ERP system for effective usage.

Resource Planning:

Created a detailed resource plan leading up to go-live, facilitating a successful transition from the previous system to Dynamics 365 Business Central.

Data Migration Framework:

Developed a robust framework and plan for data migration, ensuring the integrity and accuracy of data throughout the process.

System Maintenance Framework:

Partnered with the implementation team to establish a framework for ERP system maintenance, including backup procedures and update protocols.

Best Practices Implementation:

Ensured adherence to best practices in ERP implementation methodologies, enhancing the overall effectiveness of the project.

Post-Implementation Support Planning:

Designed a post-implementation support timeline, outlining ongoing assistance and resources for users after the go-live date.

Issue Resolution:

Acted as the primary liaison with the implementation partner and ERP provider post-go-live, troubleshooting issues and coordinating solutions to ensure uninterrupted operations.
