Profile Summary

Hello I'm Yosef Maregn, and I'm an IT professional with a strong background in information technology and system administration.

I am a System and Network Engineer with a solid background in managing and supporting IT infrastructure, including servers, networks, and security systems. I have hands-on experience with configuring and maintaining Windows and Linux servers, managing Active Directory, implementing network solutions, and troubleshooting connectivity issues. My skills also include working with firewalls, switches, and other network devices to ensure stable and secure environments.

I am passionate about designing reliable systems, improving network performance, and minimizing downtime. My goal is to contribute to a dynamic IT team where I can apply my expertise, support business operations, and continue growing professionally in system and network administration.
