Profile Summary

I am a skilled Full Stack Developer, with over 5 years of professional experience in building scalable, user-friendly web applications for both Ethiopian and international clients across industries. With a solid background in both frontend and backend development, I specialize in technologies such as React, TypeScript, Springboot, and postgresql, and have delivered solutions across sectors like e-commerce, finance, administration, and healthcare.

I hold a B.Sc. in Software Engineering from Addis Ababa University and have hands-on experience in Agile development, RESTful APIs, test-driven development (TDD), and modern frameworks like Express js, Django, Angular, and Vue. I am proficient in collaborative software development, code reviews, and optimization efforts to ensure high-quality deliverables.

My career goal is to continue evolving as a full stack engineer while also contributing to the advancement of artificial intelligence, combining practical software development experience with innovative AI-driven solutions that have real-world impact.
