## Profile Summary

I am a skilled software developer specializing in responsive UI/UX design and dynamic web application development. I am committed to leveraging my expertise to address technological

challenges while contributing to organizational growth and advancing my career.

## Work Experience

**Frontend Software Developer at Kifiya Financial Technologies, Addis Ababa, ET (2024-09-04 - 2025-07-30)**

Location: Addis Ababa, Ethiopia

Responsibilities: -Designed and implemented responsive, user-centric UI/UX components using modern design principles, ensuring consistency, accessibility, and aesthetic appeal across  multiple devices and screen sizes.

-Developed and maintained web applications using React.js, leveraging advanced React features such as hooks, context API, and state management libraries to deliver dynamic and high-performance user interfaces.

-Collaborated with backend engineers to integrate secure and scalable functionalities, ensuring seamless interaction between frontend and backend systems while prioritizing performance optimization.

-Partnered with product managers and stakeholders to transform product concepts into fully functional web applications, delivering features that align with business  objectives and user needs.

**Systems Administrator at Arby Construction Limited (2018-12-01 - 2024-09-30)**

Location: Nairobi, Kenya

Responsibilities: -Assisting with management of the company's proprietary information system for optimum operations.

-Ensuring storage of accurate data for reference and output projections.

-Maintaining a web-based information system for handling client information.

-Handling client queries on system functions, including record entries, bidding, and payment requisitions.

-Working with system developers to ensure continuous improvement of management information system.

**Customer Support Assistant at The National Treasury, Kenya (IFMIS Department) (2015-06-01 - 2015-12-15)**

Location: Nairobi, Kenya

Responsibilities: -Coordinated with IFMIS department and County departments in ensuring remote access and functionality of systems.

-Performed on-site and remote client services such as troubleshooting, logging, and system setup.

-Configured and maintained computer networks for uninterrupted internal and external access.

-Assisted supervisors in regular improvements of the systems based on client feedback.
