Profile Summary

I'm Yared, a full-stack developer with a strong focus on front-end engineering and over two years of hands-on experience. I specialize in building scalable, responsive applications using React (with TypeScript, Next.js, and Tailwind CSS) and have solid experience on the backend with Node.js (Express/NestJS) and Python (Django, FastAPI, Flask). My background in competitive programming gave me a deep foundation in problem-solving, which I bring into every project I work on. I've led and contributed to impactful projects across domains including fintech, education, and volunteer platforms, often collaborating with cross-functional teams.

Work Experience

Web Developer at Africa to Silicon Valley (2024-08-01 - 2025-01-17)

Location: Addis Ababa, Ethiopia

Responsibilities: - Collaborating as a front-end developer on the Akil platform, connecting over 1000

volunteers with 30+ NGOs, while offering additional features.

- Leveraged RTK Query to reduce page load time by 20% and improve user engagement

- Integrated a chatbot into the platform using OpenAI's API, enhancing user interaction

and support.
